# Panelist

Imran Ahmed Shah

Opening Introduction  
&  
Workshop Objective,  
Problems Identification and Recommendations

# Online Safety Awareness and Development of Sustainable Civilized Internet for the Next Generation (The Innocent Minds)

With the context of last three years of advocacy for at APrIGF Conferences for the formation of a Civilized Internet, we believe that it the right time to do some practical development work.

It is also a right time to review the Internet sphere, emphasizing our extending focus to evaluate the current Internet System, the contents, the usage, the users and its penetration in our life.

# Online Safety Awareness and Development of Sustainable Civilized Internet for the Next Generation (The Innocent Minds)

We should know that what kind of contents we have, what type of contents are being developed, and what kind of safety & protection we are providing to our users against new threats and challenges and what kind of Internet we are handing over to our Next Generation.

# Online Safety Awareness and Development of Sustainable Civilized Internet for the Next Generation (The Innocent Minds)

Research reports, especially a survey conducted by European Union under the EU Safer Internet Programme is to be discussed here. Some of the panelists would also be discussing the need for the awareness campaign for online safety, protection, and the development for a sustainable Civilized Internet for our Next Generation, the Innocent Minds.

# Online Safety Awareness and Development of Sustainable Civilized Internet for the Next Generation (The Innocent Minds)

Since last three years evaluation debates, we learned that the Secure and Civilized Internet is not only a need of the community from Asia Pacific region but the EU supported programme is also evident enough that European Community is standing with us and demanding some Civilized Internet.

So, we have a Global Support for the formation of Civilized Internet.

# Online Safety Awareness and Development of Sustainable Civilized Internet for the Next Generation (The Innocent Minds)

In order to take first step (towards the foundation Civilized Internet),  
I would suggest the a Global Consortium which may given a name such as

- Global Council for the Civilized Internet.

Second step is to develop a Code of Ethics, Regional and National levels defining that what type of contents and applications are safe to be provided to the age base user group.

## Online Safety Awareness and Development of Sustainable Civilized Internet for the Next Generation (The Innocent Minds)

Third step would be the development of the Mechanism that how we can develop a repository of the websites, web contents, web applications and social networks that fulfill the basic requirements as per advise of the Council, and how to deliver to the age base user group.

I would suggest every one to suggest the development mechanism and contribute in making these initiative truly successful.

# Q & A

# Thanks
