Message from Yuliya Morenets:

Let me make a few comments that I hope could be useful:

1. First of all, we would support the creation of such a network and would be interested in being part of it, but let me suggest not to reinvent the existing initiatives in the region and the work done also by IMPACT and the COP/ITU, so I would practically suggest to include what is done in the region and try to share on the basis of the network what exists rather than duplicate.

Yuliya Morenets

2. From the legal perspective I would also suggest the following actions for the region:
 1. Need to go with cybercrime & cybersecurity strategy
 2. Need to be harmonized and answer national & regional priorities
 3. Need to have a balanced approach/empowerment
 4. Need to be part of the Framework on Child online Protection of the ITU
 5. Different aspects to take into account from child abuse to the liability of ISPs
 6. Legal approach on COP is broader than what we have today.

3. Pay particular attention to vulnerable/marginalized children and young people, develop targeted research and specific capacity building methodology for this particular target group, as they are more fragile online.

We have produced on this with the University of Strasbourg, please share on the APrIGF website for those who like to read.
